

- I. POST PATIENT CONTACT AIRBORNE/DROPLET DISEASE NOTIFICATION:
- A. If it is determined through the hospital or through the Public Health Department that a patient has a contagious disease that was not assessed during the patient contact, then the hospital or the Public Health Department should contact the San Luis Ambulance Adam-3 at (805) 550-8604 with the information pertaining to the contagious disease. This is a 24-hour contact number.
 - B. San Luis Ambulance Adam-3 will research and notify the EMS Personnel of San Luis Ambulance Service, as well as research the other EMS Providers that were on the scene. After it is determined who the other EMS Providers were, San Luis Ambulance Adam-3 will contact the appropriate supervisor to notify them of the contagious disease exposure. The supervisor will determine if there were any other EMS Personnel on scene. All of the information gained from the hospital or the Public Health Department will be passed on to the supervisor including contact numbers.
 - C. If any EMS Provider becomes aware of an exposure to a contagious disease they should contact the Public Health Department and any other EMS Providers.
