

COUNTY SERVICE AREA NO. 7-A
COUNTY OF SAN LUIS OBISPO
STATE OF CALIFORNIA

ORDINANCE NO. 2338

AN ORDINANCE ESTABLISHING THE COUNTY SERVICE AREA NO. 7-A
SEWER USE ORDINANCE AND DISTRICT
RULES AND REGULATIONS

The Board of Supervisors of the County of San Luis Obispo, on behalf of County Service Area No. 7-A, do ordain as follows:

SECTION 1. That there is hereby established a County Service Area No. 7-A Ordinance, pursuant to the authority of California Health and Safety Code Sections 4766 and 5470 through 5474.10, to read as follows:

ARTICLE 1. GENERAL PROVISIONS

1.1 The provisions of this Ordinance shall apply to any building or lot, as defined herein, connected to or eligible for connection to the public sewer for and within County Service Area No. 7-A (CSA No. 7-A), or to which said public sewer is available.

1.2 A violation of any provision of this Ordinance is a misdemeanor punishable by fine not to exceed Three Hundred Dollars (\$300.00), imprisonment not to exceed six (6) months, or both.

ARTICLE 2. DEFINITIONS

2.1 Apartment: A single family residence as defined herein, which is part of or located in a multiple family dwelling as defined herein.

2.2 Board of Supervisors: The Board of Supervisors of the County of San Luis Obispo.

2.3 Building: Any structure within District, used for human habitation, or as a place of business, recreation, and/or any other

wastewater generating activity and containing any fixture(s) as defined herein.

2.4 Building Sewer: That portion of a sewer beginning two (2) feet from any building and extending to and including its connection to a public sewer.

2.5 Cleanout: A branch fitting installed in a sewer for the purpose of providing access for cleaning.

2.6 Commercial Establishment: A building or portion thereof used for, or intended for use for, commercial, business or governmental purposes, including but not limited to stores, markets, theatres, business offices, government offices and other places of business, but not including food establishments, laundromats, or other business establishments otherwise defined herein.

2.7 County: The County of San Luis Obispo.

2.8 County Engineer: The County Engineer of the County of San Luis Obispo.

2.9 District: San Luis Obispo County Service Area No. 7-A.

2.10 Fixture: Any sink, tub, shower, toilet, grease, oil or sand interceptor, garbage grinder, dish or clothes washer, or any other wastewater collecting, generating, treating or conveying device, discharging to the public sewer.

2.11 Food Establishment: A building or portion thereof, upon the premises of which are provided facilities for dining, eating and/or beverage consumption by the public, and which is held out by the owner or operator thereof as a place where food and/or beverages may be purchased for consumption upon the premises, including establishments designated as restaurants, cafes, drive-ins, coffee shops, ice cream parlors, bars, and bowling alleys, and other such establishments where food or drink are served.

2.12 Garbage: Solid wastes from the preparation, cooking, and dispensing of food, and from the handling, storage, and sale of agricultural products.

2.13 Garbage Grinder: A device designed and used to grind or otherwise treat garbage so that it can be disposed of through the public sewer.

2.14 Grease, Oil, or Sand Interceptor: A device designed and installed on private property to accumulate sand, grease and/or volatile liquids and prohibiting them from entering into the public sewer system.

2.15 Improved Parcel: Any lot shown on the assessment roll of the County Assessor of San Luis Obispo County as a parcel to which improvements have been made and to which a separate Assessor's parcel number is assigned.

2.16 Lateral Sewer: That portion of a public sewer lying within a public right of way or easement, which connects, or is intended to connect, a building sewer to a main sewer.

2.17 Laundromat: A building or portion thereof designed, equipped, and used or intended for use as a self-service laundry, where there is no pickup or delivery service and no steam or hand laundry of any type.

2.18 Lot: Any piece or parcel of land within District, bounded, defined, or shown upon a plot or deed recorded in the Office of the County Recorder of San Luis Obispo County; provided, however, that in the event any building is located upon more than one such parcel of land, all under one ownership, the term "lot" shall include all such parcels of land.

2.19 Main Sewer: That portion of a public sewer, excluding lateral sewers, the purpose of which is to accept wastewater and convey it to the wastewater treatment plant.

2.20 Manhole: A structure for the purpose of providing access of a human to a buried public sewer.

2.21 Multiple Family Dwelling: A building or group of buildings designed as, and occupied or suitable for occupancy as, a home or living quarters, either permanently or temporarily, by more than a single family, including buildings designated as apartment houses, apartment buildings, duplexes, triplexes and condominiums, but not including motels, hotels, dormitories, or trailer courts.

2.22 Permit: Any written authorization required pursuant to this Ordinance.

2.23 Person: Any human being, individual, firm, company, partnership, association, corporation, government agency or other entity.

2.24 pH: The logarithm of the reciprocal of the weight of hydrogen ions in grams per liter of solution.

2.25 Public Sewer: That portion of a sewer lying within a public right of way or easement, and maintained by and subject to the jurisdiction of County on behalf of District.

2.26 Sewer: A pipe or conduit for carrying wastewater.

2.27 Shall, Will and May: Shall and will are mandatory; may is permissive.

2.28 Single Family Residence: A building or portion thereof, or a group of buildings, designed as and occupied or suitable for occupancy in whole or in part as a home or living quarters, either permanently or temporarily, by a single family and its guests and/or servants.

2.29 Unimproved Parcel: Any lot shown on the assessment roll of the County Assessor of San Luis Obispo County as a parcel to which improvements have not been made and to which a separate Assessor's parcel number is assigned.

2.30 UPC: The Uniform Plumbing Code, Current Edition, as published by the International Association of Plumbing and Mechanical Officials.

2.31 Wastewater: Any water-carried wastes, and the water carrying such wastes, from buildings as defined herein.

2.32 Wastewater Treatment Plant: The arrangement of ponds, plumbing, devices and structures used for treating wastewater generated within District, and including the lot upon which such plant is situated.

ARTICLE 3. SEWER CONNECTION AND ABANDONMENT OF LOCAL
WASTEWATER DISPOSAL SYSTEM REQUIRED

3.1 For the purposes of this Article a public sewer shall be deemed to be available to a lot or building if said public sewer is operating and is installed in a public right of way or easement

adjacent to said lot or to the lot upon which said building is located.

3.2 When a public sewer becomes available to a building, said building shall be connected to said public sewer within ninety (90) days after said public sewer is available, and any cesspool, septic system, drywell or other local means of wastewater disposal situated on the lot occupied by said building, shall be abandoned as provided in Article 3.5, below, unless a variance is granted by the Board of Supervisors.

3.3 Any newly-constructed building to which a public sewer is available shall be connected to said public sewer prior to its use for human occupancy, unless a variance is granted by the Board of Supervisors.

3.4 Variances referred to in Articles 3.2 and 3.3 may be granted only after written application to the Board of Supervisors by the owner of the building, setting forth the basis for such request. Variances may be granted only upon affirmative showing that extreme hardship will accrue to the owner and/or occupant of said building if required to connect said building to the public sewer and, also, that no health hazard, hardship or inequity to any other lots or buildings or the owner(s) or occupant(s) thereof, or to the District or the County will result from the granting of such variance.

3.5 When any building with a local wastewater disposal system(s) is connected to the public sewer, the owner of said building shall, within thirty (30) days from the date of connecting to said public sewer, abandon said local wastewater disposal system(s) in the manner prescribed by the County Building Department in accordance with the UPC.

ARTICLE 4. PERMITS AND FEES

4.1 It shall be unlawful for any person other than County to make any connection with any public or building sewer, or to construct or alter any public or building sewer within District, without first obtaining a permit from County for such work.

4.2 It is the intent of this Article 4 that, in each instance in which connection of a building to the public sewer is desired, the owner of the lot upon which said building is located shall make his or her own arrangements with a licensed contractor to perform the work, and shall submit satisfactory evidence to County that such arrangements have been made prior to issuance of any permit called for by this Ordinance.

4.3 The following procedures will be followed in obtaining any required permit(s) for any work involving a public or building sewer:

- (1) Said lot owner, or said lot owner's authorized representative, shall make written request, either in person or by mail, to County Engineer for a sewer service availability letter. Said request shall include both the owner's and the representative's name(s), both the owner's mailing address and the service address, and the Assessor's Parcel Number (APN). Said availability letter shall be provided only after payment of any required connection fees.
- (2) Said lot owner, or said lot owner's authorized representative, shall then make application in writing to the County Building Department, giving, along with said availability letter and said evidence of arrangements with a licensed contractor, such other information as the County Building Department may require, on forms furnished by the County Building Department for that purpose.
- (3) If the work to be performed thereunder is to be done according to the regulations contained in this Ordinance and otherwise provided by law governing the construction of such work, a permit shall be issued after payment of any required inspection fees.

4.4 Nothing contained in this Article shall be deemed to require an application for, or the issuance of, a permit for the purpose of removing stoppages or repairing leaks in a building sewer, except when it is necessary to replace any part of such sewer.

4.5 The following fees shall be paid by applicants for permits:

- (1) The connection fee required under Article 4.3 (1), above, shall be that amount, as determined by County Engineer, at the time of the request for said availability letter, which will provide an equitable apportioning of the capital costs of the sewer system.
- (2) The inspection fee shall be that fee prescribed by the Board of Supervisors and in effect at the time of application for a permit under Article 4.3(2) above, and collected by the County Building Department for such services.
- (3) When the work to be done requires cutting into and installing a connection fitting in the main sewer, the fee for this portion of the work shall be two hundred (\$200) dollars payable to County Engineer. Any such cut and fitting installation will be made by District personnel, only after all appropriate connection and/or permit fees have been paid, and after the trench has been prepared (including any necessary safety provisions) by the permittee's contractor. The fee for this portion of the work is in addition to all other required fees of whatever kind."
- (4) When any portion of the work is to be performed within the limits of a public right of way or public sewer easement, an encroachment permit shall be obtained from County Engineer only after payment of the fees prescribed by the Board of Supervisors and in effect at the time.

4.6 It is the intent of County to allocate the costs of providing sewer service equitably throughout District by the application of these regulations and, notwithstanding any provisions of the foregoing Articles, County may in any instance increase or decrease the fee to be charged for any extraordinary service to achieve such objective.

ARTICLE 5. PUBLIC SEWER EXTENSIONS

5.1 Any person desiring an extension of the public sewers of District to serve a building or a group of buildings within District shall make application as follows:

- (1) Any person desiring an extension of the public sewer system to serve a building or a group of buildings within District shall make a written application to County Engineer, including therewith a preliminary investigation of the feasibility of said extension prepared by a Civil Engineer registered in the State of California. Said preliminary investigation shall include an estimate of the cost of said extension, including any necessary repairs to affected roadways.
- (2) County Engineer shall review said application and investigation and, if said County Engineer determines that the requested extension is feasible financially and technically for District, and that the extension will not impose any burden or hardship on District or County, then the applicant may submit improvement plans and specifications for the proposed extension, prepared by a Civil Engineer registered in the State of California, for review by County Engineer.
- (3) If County Engineer approves said improvement plans, the applicant may construct said extension, subject to such terms and conditions as County Engineer may prescribe.
- (4) Before commencing any work on said extension, the applicant shall execute and file a written agreement with County whereby the applicant agrees to complete all required improvements at said applicant's sole expense and to the satisfaction of County Engineer, within the time period specified in the agreement. At the time of filing said agreement, applicant shall also deposit with County Engineer securities in the amount of not less than one hundred fifty (150%) percent of the applicant's engineer's estimate of the costs of said improvements, as

approved by County Engineer. Said securities may be bonds or certificates of deposit payable to County, issued by issuing agents acceptable to County, or cash. The applicant further agrees to provide County Engineer with detailed records of the actual, total, final costs of all improvements authorized in the agreement. The agreement shall also provide for inspection of all improvements by County Engineer or his designated representative, and reimbursement to County Engineer, by the applicant, for the costs of said reviews, approvals and/or inspections. The improvements agreement may also provide for the construction of the improvements in units or stages, and for an extension of the specified time period under conditions therein specified. No extension of time shall be granted except upon certification by County Engineer that such extension is justified.

- (5) County Engineer will invoice the applicant for all costs incurred in the performance of any reviews, approvals and/or inspections under this Article. Any amount unpaid thirty (30) days after the date of the invoice shall bear interest at twenty percent (20%) per annum or the maximum rate permitted by law, whichever is less, beginning thirty (30) days after the date of the invoice.
- (6) No hookup of the extension to the public sewer shall occur until all improvement work has been completed to the satisfaction of County Engineer, nor until after all charges have been paid by the applicant in accordance with the provisions of this Ordinance.

5.2 County may approve refund agreements with persons who have paid for extensions to the public sewer. Said agreements shall provide for reimbursement of portions of the costs borne by said persons for said sewer extensions, at such time within ten (10) years of the completion of said extensions as money is paid to County for connections of other buildings to said sewer extensions, as provided for in Article 5.3, below.

5.3 No building shall be connected to an extension to the public sewer within ten (10) years of the completion of said extension, until the owner of said building has paid to County a proportional share, as determined by County Engineer, of the cost of said sewer extension.

ARTICLE 6. INSPECTIONS

6.1 All work done under the provisions of this Ordinance shall be subject to inspection by County. Notice must be given in writing to County by the person, firm or corporation doing said work, or causing same to be done, immediately after said work is ready for inspection. Until the time of the inspection all work shall remain uncovered and convenient for the inspector's examination. If any such work is enclosed or covered in any way whatsoever, so as to tend to obstruct a thorough inspection of the work, said obstruction must be removed upon notice so to do from County, before an inspector shall be required to inspect the work. When, upon examination by the inspector, it appears that any such work is defective, either in its construction or material, the same shall be made to conform to the requirements set forth in this Ordinance, in default whereof the permit therefor shall be revoked by County and subject work shall be discontinued immediately.

6.2 When it appears to the satisfaction of County that any work authorized by this Ordinance has been constructed according to, and meets the requirements of, all provisions of this Ordinance and other applicable laws, and that all the fees for the doing and inspection thereof have been paid, County shall cause to be issued to the person, firm or corporation constructing such work a certificate of final inspection, which certificate shall recite that such work as has been done pursuant to the permit, has been constructed according to the provisions of this Ordinance, and that said work is in sanitary condition. County shall not issue such certificate of inspection unless all requirements of this Ordinance have been met.

ARTICLE 7. BUILDING SEWERS

7.1 Every building in which a fixture is installed or located shall be separately and independently connected with the public sewer, except that, on a case by case basis, County Engineer may approve the connection of more than one building to the public sewer by a common building sewer, if County Engineer determines that requiring a separate and independent connection would cause or aggravate a hardship, and that such approval is consistent with good engineering practice and will impose no burden or hardship on District or County.

7.2 The requirements for building sewers as set forth in the latest adopted version of the UPC shall apply in District and are incorporated herein by reference. However, where the requirements of this Ordinance are more restrictive than said UPC, this Ordinance shall apply.

7.3 Building sewers will be placed on a uniform slope of not less than one-fourth ($1/4$) of an inch per foot, except that when it is determined by County Engineer that such slope cannot be obtained without unusual hardship to the building owner, then a slope of not less than one-eighth ($1/8$) of an inch per foot may be used if County Engineer also determines that no burden or hardship will be imposed on District or County by allowing the lesser slope.

7.4 No portion of a building sewer, or its connection to the public sewer, will be covered or concealed in any manner until it has been inspected and approved by County.

ARTICLE 8. ANNEXATIONS

8.1 In the event that real property is annexed to District, no building within said annexed territory shall be connected to the public sewer unless and until County Engineer determines that such connection complies with this Ordinance.

8.2 In the event that connection of a building within the annexed territory is allowed, County Engineer shall use the same criteria used to establish the proportional charges against the lots

originally within District, and determine the amount of an equivalent charge for each annexed lot to which the public sewer is to be extended. When the cost of extending the public sewer to a particular lot is less than said equivalent charge, then an in-lieu fee shall be charged for extending the public sewer to said lot. Said in-lieu fee shall be equal to the difference between the actual cost of extending the public sewer to said lot and the aforesaid equivalent charge, except that an estimate of the costs may be used in computing the in-lieu fee, subject to adjustment when actual costs have been determined. The in-lieu fee shall be paid before a permit is issued for connection of said building to the public sewer.

ARTICLE 9. PROHIBITED DISCHARGES

9.1 No person shall discharge or cause to be discharged any rainwater, stormwater, surface water, groundwater, roof runoff, swimming pool water, sub-surface drainage, cooling water or industrial process waters into the public sewer.

9.2 No person shall discharge or cause to be discharged any of the following described wastewaters, wastes or substances to any public sewer:

- (1) Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.
- (2) Any wastewaters, wastes or substances containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any wastewater treatment process or constitute a hazard to humans or animals, or create any hazard in the receiving waters of the wastewater treatment plant.
- (3) Any wastewaters, wastes or substances having a pH lower than 5.5, or having any other corrosive properties capable of causing damage or hazard to structures, equipment, and/or personnel of County.
- (4) Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or

other interference with the proper operation of the wastewater treatment or collection facilities, such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, paper materials such as newspapers, dishes, cups, milk containers, and meat processing wastes such as animal skins, intestines, fleshings, and paunch materials retained on a screen having eight (8) meshes per inch each way.

- (5) Any liquid or vapor having a temperature higher than one hundred fifty degrees (150°) Fahrenheit.
- (6) Any wastewaters, wastes or substances which may contain more than one hundred (100) parts per million, by weight, of fat, oil, grease, or wax.
- (7) Any wastewaters, wastes or substances containing suspended solids of such character and quantity that unusual attention or expense is required to handle such materials at the wastewater treatment plant.
- (8) Any noxious or malodorous gas or other substance capable of creating a public nuisance either by itself or by interaction with other substances.
- (9) Any domestic or other wastewaters, wastes or substances obtained from a local wastewater disposal system.
- (10) Any wastewaters, waste or substances which causes discoloration differing from that caused by domestic sewage.
- (11) Any radioactive wastewaters, wastes or substances.
- (12) Any wastewaters, wastes or substances containing constituents which are not amenable to treatment or which cause the treatment plant effluent to fail to meet the discharge requirements established by the State Water Resources Control Board, the California Regional Water Quality Control Board or any other Local, State or Federal regulatory agency.

9.3 Grease, oil and sand interceptors shall be provided when, in the opinion of County Engineer, they are necessary for the proper handling of wastewaters, wastes or substances containing grease in excessive amounts, or containing any sand, or other harmful ingredients; except that such interceptors shall not be required for a single family residence. All interceptors shall be of a type and capacity approved by County Engineer and shall be located so as to be readily and easily accessible for cleaning and inspection.

9.4 Grease and oil interceptors shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperature. They shall be of substantial construction, watertight, and equipped with easily removable covers which, when bolted in place, shall be gas-tight and water-tight.

9.5 Where installed, all grease, oil and sand interceptors shall be maintained by the owner, at owner's expense, in continuously efficient operation at all times.

9.6 Any water softener originally installed in a building after the effective date of this Ordinance, and any water softener installed in a building after the effective date of this Ordinance to replace an existing water softener, shall be of the type which is regenerated at a location where salt brines or other waste substances resulting from said regeneration are not discharged into the public sewer, and shall be plumbed so that water passing through said water softener does not serve any toilet or urinal, or any hose bib, pipeline or fixture supplying water for irrigation or other exterior uses. No person shall cause or permit salt brines or other substances resulting from said water softener regeneration process to be discharged into the public sewer.

ARTICLE 10. SEWER FACILITIES FUND

10.1 A Sewer Facilities Fund is hereby established to consist of revenue obtained from connection fees, sewer extension deposits, and such surplus revenues from monthly sewer charges as the Board of Supervisors may authorize to be paid to the Fund annually.

10.2 The Sewer Facilities Fund shall be primarily a sinking fund to finance expansion and replacement of the wastewater treatment facilities, and the replacement or enlargement of truck sewer lines or other sewer lines larger than eight (8) inches in diameter.

10.3 The Board of Supervisors may utilize any monies in the Fund to construct public sewers in streets or easements to extend service to previously unsewered areas when the costs of such sewer construction are to be reimbursed by the owner(s) of the properties for which such sewer extensions are requested. Before monies from said funds are so used, the Board of Supervisors shall enter into an agreement with the owner(s) of the properties to be served, which shall provide:

- (a) That all monies so expended shall be repaid within a period not to exceed ten (10) years.
- (b) That interest on the unpaid balance shall be accrued at a rate of twenty percent (20%) per annum or the maximum rate allowable by law, whichever is less.
- (c) That failure to repay all monies is stipulated in said agreement shall result in a lien being placed against the property or properties affected.

10.4 If the Board of Supervisors determines that other forms of segregation and/or other methods of application of District funds will be more appropriate, then the procedures set forth by this Article 10 may be revised by Resolution.

ARTICLE 11. SEWER CHARGES

11.1 There is hereby levied and imposed upon any building or lot within District, having any connection with the public sewer or otherwise discharging wastewater which ultimately passes through the public sewer, or to which a public sewer is available according to Article 3.1 of this Ordinance, and upon the owner thereof, an annual sewer service, standby, or immediate availability charge (all collectively referred to herein as sewer charges). Said annual sewer charges are as follows:

	<u>Classification</u>	<u>Charge</u>
(1)	Improved Parcel	\$72.00
(2)	Unimproved Parcel	\$36.00

11.2 For any building connected to the public sewer, but for which a specific classification for sewer charges has not been set forth in Article 11.1, above, County Engineer shall determine such a rate as in his sole discretion he deems most applicable for the use being made of the building in relation to the uses being made of classified buildings and the rates fixed for said classified buildings. Such rate is hereby levied and imposed upon said unclassified building and the owner of such building as though said building had been classified and set forth in Article 11.1, above.

11.3 Whenever requested in writing by County Engineer, information necessary to the accurate computation of a sewer charge for a particular building or lot shall be furnished to County Engineer by the owner of such building or lot.

11.4 In the event of failure of a building owner to furnish such information when requested and within the time allowed, the County Engineer may compute a rate based on such information as he finds reasonably available and such computation shall be conclusive and final.

11.5 Sewer charges under this Ordinance may be fixed and collected in accordance with Section 25210.77a of the Government Code of the State of California as follows:

- (a) Once a year the Board of Supervisors shall cause to be prepared a written report which shall contain a description of each parcel of real property receiving the particular extended service and the amount of the charge for each parcel for such year computed in conformity with the procedure set forth in the ordinance authorizing collection of such charges on the tax roll. Such report shall be filed with the Clerk of the Board of Supervisors.
- (b) Upon the filing of such report, the Clerk shall fix a time, date, and place for hearing thereon and for filing

objections or protests thereto. The Clerk shall publish a notice of such hearing as provided in Section 6066 of said Government Code, prior to the date set for hearing, in a newspaper of general circulation printed and published in the County.

- (c) At the time, date, and place stated in the notice, the Board of Supervisors shall hear and consider all objections or protests, if any, to the report and may continue the hearing from time to time. Upon conclusion of the hearing, the Board of Supervisors may adopt, revise, change, reduce, or modify any charge and shall make its determination upon each charge as described in the report and thereafter, by resolution, shall confirm the report.
- (d) The charges set forth in the report, as confirmed, shall appear as a separate item on the tax bill. The charge shall be collected at the same time and in the same manner as ordinary county ad valorem property taxes are collected and shall be subject to the same penalties and the same procedure and sale in case of delinquency as provided for such taxes. All laws applicable to the levy, collection, and enforcement of county ad valorem property taxes shall be applicable to such charge; except that if for the first year such charge is levied the real property to which such charge relates has been transferred or conveyed to a bona fide purchaser for value, or if a lien of a bona fide encumbrancer for value has been created and attaches thereon, prior to the date on which the first installment of such taxes would become delinquent, the charge confirmed pursuant to this section shall not result in a lien against such real property but instead shall be transferred to the unsecured roll for collection.
- (e) Whenever a railroad, gas, water, or electric utility right-of-way or electric line right-of-way is included

within such service area, or zone thereof, the railroad, gas, water, or electric utility right-of-way or electric line right-of-way shall be subject to the charges authorized only if, and to the extent that, it is found that it will benefit from the particular extended service, and the railroad, gas, water, or electric utility right-of-way or electric line right-of-way shall be subject to the same penalties, and the same procedure and sale, in case of delinquency as other properties in such service area or zone. In determining whether or not the railroad, gas, water, or electric utility right-of-way or electric line right-of-way benefits from the extended service, its use as a right-of-way for a railroad, gas, water, or electric utility shall be presumed to be permanent.

11.6 County may also elect to have such sewer charges collected by any means authorized in the applicable sections of the Government Code and/or the Health and Safety Code of the State of California. Such charges shall be delinquent on the date indicated in the bills rendered therefor, after which date a delinquent penalty, calculated at twenty percent (20%) per annum or at the maximum rate allowable by law, whichever is less, shall be due and payable with the delinquent charges upon which they are imposed.

11.7 County hereby elects to have said sewer charges collected semi-annually, in advance, on the County Tax Roll in the same manner as its general taxes, as an alternative to other methods of collection prescribed herein.

11.8 County hereby elects to have delinquent sewer charges collected on the County Tax Roll in the same manner as its general taxes, as an alternative to other methods of collection prescribed herein, pursuant to Health and Safety Code Sections 5473 and 5473a.

11.9 As an alternative to any other procedures provided for herein, County may file an action at law to collect any delinquent sewer charges and penalties thereon. In the event of such an action at law, County may also pray to the Court that favorable judgment

therefor shall include the costs of the suit and reasonable attorney's fees arising from such action.

ARTICLE 12. ENFORCEMENT

12.1 As an alternative to any other measure provided by law for enforcing the provisions of this Ordinance, County may terminate sewer service to the building, structure or lot in question. Upon termination, County Engineer or his representative shall estimate the cost of termination and reconnection to the public sewer and the building owner shall deposit this amount with County Engineer before being reconnected. County shall refund any part of the deposit remaining after payment of all costs of termination and reconnection.

12.2 Any person, who by reason of special circumstances believes that the application of any of the provisions of this Ordinance to him is unjust or inequitable, may make written application to the Board of Supervisors for relief therefrom. Said application shall set forth all of the special facts and circumstances and shall request the specific relief or modification desired. The Board of Supervisors upon receipt of such application and after such investigation as deemed necessary, may take action to grant such relief or modification as it finds appropriate. The Board of Supervisors, on its own motion and without application, may, when special circumstances make the application of any provision(s) of this Ordinance unjust or inequitable, modify or suspend any such provision(s) for the period during which the special circumstances exist.

SECTION 2. All monies, securities and/or equities collected under the provisions of this Ordinance will be deposited into the CSA No. 7-A Sewer Facilities Fund. (See Article 10 of SECTION 1, above.)

SECTION 3. If any portion of this Ordinance or the application thereof is held to be invalid for any reason, the validity of all remaining portions and applications shall be unaffected and shall remain in full force and effect.

SECTION 4. This Ordinance shall be in full force and effect thirty (30) days after its passage, and before the expiration of fifteen

(15) days after the passage of this Ordinance, it shall be published once, with the names of the members of the Board of Supervisors voting for and against this Ordinance, in the Paso robles Daily Press, a newspaper of general circulation published in the County of San Luis Obispo, State of California.

PASSED AND ADOPTED by the Board of Supervisors of the County of San Luis Obispo, State of California, this 9th day of FEBRUARY, 1988, by the following roll call vote, to-wit:

AYES: SUPERVISORS Jerry Diefenderfer, Carl Hysen, Evelyn Delany
NOES: James Johnson and Chairman William B. Coy
ABSENT:

William B. Coy

Chairman of the Board of Supervisors of the County of San Luis Obispo, State of California

ATTEST:

[Signature]

Clerk and ex-officio Clerk, County of San Luis Obispo, State of California
