## SPECIAL ASSESSMENTS & DIRECT CHARGES

**2024 – 2025**

Prepared under the direction of  
James W. Hamilton CPA, Auditor-Controller/Treasurer/Tax Collector

# Special Assessments & Direct Charges

State law allows some local districts the option to place numerous types of non-ad valorem assessments & charges on the property tax bills. Each annual tax roll is unique and separate from those of previous and subsequent years. The Auditor must obtain verification each year from the districts that State law authorizes the charges to be placed on the tax roll.

## COUNTY OF SAN LUIS OBISPO

### UNDERSTANDING DIRECT CHARGES

TYPE OF CHARGE	DESCRIPTION	HOW IS THE ANNUAL CHARGE DETERMINED	REQUIREMENTS TO MODIFY THE AMOUNTS CHARGED	HOW LONG WILL CHARGE CONTINUE
Benefit Assessment (BA)	Used by local governments to pay the costs of providing fire suppression, flood control and other services to a particular community and are assessed against only those properties that directly benefit from the services or improvements financed.	Each parcel in the service area is assessed according to the specific benefit it receives from the services or improvements and the charge cannot be based on property value. It is not subject to Proposition 13 limitations.	Cannot be increased without the majority consent of the property owners. This requires a written notice to all affected property owners, a public hearing and an assessment ballot vote.	Most benefits assessments will continue as long as services are provided.
1982 Act Benefit Assessment District (1982 BA)	Used to finance the maintenance and operation of public systems such as drainage, flood control and street lighting.	The charge must be related to the benefit received by the parcel and can be based on class of property improvement, property use, or on a per-parcel basis, or any combination of those factors.	The agency must give written notice to all affected property owners, hold a public hearing and an assessment ballot vote, which requires a majority approval for the rate to be increased.	Assessments that pay for ongoing services will continue as long as those services are approved. Assessments levied to finance major improvements may cease after the project has been fully funded.
1972 Landscape and Lighting Benefit Assmt (1972 BA)	Used to pay for landscaping, lighting and other improvements and services in public areas. <i>Note: If municipal bonds or notes have been issued in connection to these assessments, the agency will have the right (and the obligation) of accelerated foreclosure.</i>	Each district establishes a benefit formula and each parcel in the service area is charged according to the benefit it receives from the services and improvements.	The agency must give written notice to all affected property owners, hold a public hearing and an assessment ballot vote, which requires a majority approval for the rate to be increased.	Assessments that pay for ongoing services continue as long as services are provided. Assessments levied to pay bonds for major improvements cease to be levied after the project has been paid off.

TYPE OF CHARGE	DESCRIPTION	HOW IS THE ANNUAL CHARGE DETERMINED	REQUIREMENTS TO MODIFY THE AMOUNTS CHARGED	HOW LONG WILL CHARGE CONTINUE
Special Taxes (SP TAX)	A tax imposed for specific purposes and must be approved by 2/3rds majority of qualified voters in the service area. It is considered a type of tax - not a fee, charge or special assessment. <i>Note: Special Taxes for Schools may include an exemption for taxpayers 65 years or older <b>only</b> if it was included by the school district in the original documents.</i>	These taxes may be applied on a uniform basis, on the basis of benefit, the cost of providing service or any other "reasonable" basis, but cannot be based on property value.	A special tax is subject to reduction or repeal by popular initiative. An initiative campaign may be launched any time after approval of the special tax.	Ongoing until reduced or repealed by popular initiative.
Standby/Availability Charge (SBC)	Normally these are charged to unimproved properties to ensure that adequate water or sewer service will be available for that parcel when needed. However, standby charges may also be imposed on developed properties to finance water and sewer service expansion, recycling projects and conservation programs.	Usually the formula is established by an engineer, specified in the original documents on file at the agency, and may be imposed on an area, frontage, or parcel basis, or any combination of these factors.	The agency is required to give written notice to all affected property owners prior to the public hearing and include a ballot for voting. A majority vote of the affected property owners is required to approve a standby charge or rate increase.	Continues as long as it is authorized each year. Usually once the property is developed or the project is completed, the charge will cease and normal service rates will apply.
Fees and Service Charges (FEE/SC)	These charges are collected for various services associated with a property. They may include sewer, garbage, water charge and the costs of separating tax bills. May also include those fees or charges that have become delinquent due to non-payment.	The amounts may only be charged if the service is actually provided. The amount of the fee may not exceed the cost of providing the service and, if delinquent,, any administration fees to cover the costs for the required noticing and pursuing payment of the fee or charge.	Service fees cannot be increased without the majority consent of the property owners. This requires a written notice to all affected property owners, a public hearing and an assessment ballot vote.	Fees can continue to be charged as long as the service is provided. Delinquent charges must be paid along with the rest of the annual tax bill and become a lien on the property until paid.

TYPE OF CHARGE	DESCRIPTION	HOW IS THE ANNUAL CHARGE DETERMINED	REQUIREMENTS TO MODIFY THE AMOUNTS CHARGED	HOW LONG WILL CHARGE CONTINUE
Abatement (ABATE)	Used to finance the prevention, mitigation, abatement or control of some type of pest, nuisance or hazard. Includes Mosquito Abatements, Vector Control, Weed and Rubbish Abatement and Nuisance Abatement.	California law allows counties and cities to perform weed, rubbish and general nuisance abatement on individual properties at the owner's expense.	For Mosquito & Vector Control, the charge is set annually and is subject to public notice and hearing requirements. For Weed, Rubbish and Nuisance, a notice will be mailed to the owner or posted on the property. If the problem is not corrected, the agency may perform the work at the owner's expense and a lien is created on the property.	Mosquito & Vector Control charges continue for as long as the service is provided. Weed, Rubbish and Nuisance charges are one-time charges on the property tax bill for a specific fiscal year.
Community Services District (CSD)	District formed in unincorporated areas allowing the County to provide a wide variety of services, including water, garbage collection, wastewater management, security, fire protection, public recreation, street lighting, mosquito abatement, library service, ambulance services, and graffiti abatement. Residents elect a board to oversee management and operations.	For bond debt, taxes are calculated upon assessed value of land and improvements and are limited to a maximum tax levy of 1% of assess value unless a majority vote authorized it to exceed that limit. By establishing zones, the district may also charge standby fees, special rates and charges, and special taxes for the maintenance and operation of improvements.	Any change to the amounts charged are subject to the oversight and approval of the CSD board. Through board meetings and local presence, the community has a direct say in what types and levels of service it receives.	The charges continue as long as the CSD is providing services to the community.

TYPE OF CHARGE	DESCRIPTION	HOW IS THE ANNUAL CHARGE DETERMINED	REQUIREMENTS TO MODIFY THE AMOUNTS CHARGED	HOW LONG WILL CHARGE CONTINUE
County Service Area (CSA)	Residents or county supervisors initiate the formation of a CSA in the unincorporated areas to provide basic services like water, sewer, police and fire protection. CSAs may span all or only selected unincorporated areas of the county.	Charges may consist of 1) general property taxes based on assessed value, 2) special taxes approved by 2/3rds of CSA residents, 3) benefit assessments subject to annual approval at a public hearing, or 4) standby charges subject to certain limitations. The CSA may charge these fees and taxes according to zones.	Each of the four types of charges is subject to its own specific restrictions.	The charges continue as long as the CSA is providing services to the community.
Mello-Roos Community Facilities District (MR CFD) Special Tax	A form of public financing that can be used by cities, counties and special districts (i.e. school districts) to provide public services such as streets, water, sewage, drainage, parks and police protection to newly developing areas. A Mello-Roos Community Facilities District (CFD) is formed by 2/3rds approval of the voters within the district. The amount and duration of charges is required to be disclosed to new buyers of a property within a Mello-Roos CFD.	The Mello-Roos Act leaves the rate and method of apportionment of the special tax to the discretion of the legislative body of the CFD. They may be based on the physical dimensions of the property (using a basis of acreage or the square footage of a dwelling) or upon a more direct measurement of infrastructure usage (vehicle trips generated per dwelling unit or gallons of water consumed per dwelling unit). The only constraint is that the special tax cannot be based on the property's value.	Two-thirds voter approval is required under Prop. 218 to increase or extend a Mello-Roos tax.	Service charges are generally subject to reduction or repeal using the local initiative power under Prop. 218, otherwise the charges can continue as long as the services are provided. For financing used to issue bonds, the charges will continue until the debt has been paid in full.

TYPE OF CHARGE	DESCRIPTION	HOW IS THE ANNUAL CHARGE DETERMINED	REQUIREMENTS TO MODIFY THE AMOUNTS CHARGED	HOW LONG WILL CHARGE CONTINUE
1911 Improvement Act Maintenance District (1911) Special Assessment	A maintenance district created so that expenses of maintaining and operating performed work or improvements are charged to the properties within the district that benefit from the work.	In order to be collected on the tax rolls, assessments must be less than \$150 and are generally a fixed amount that does not change.	Under Prop. 218, cannot be increased without the majority consent of the property owners. This requires a written notice to all affected property owners, a public hearing and an assessment ballot vote.	Assessments that pay for ongoing maintenance costs will continue as long as the improvement exists.
1915 Act Improvement Bonds (1915) Special Assessment	A form of financing to fund public improvements such as streets, curbs, gutters, water or sewer systems, etc. The 1915 Act Bonds are issued in a series and are payed through special assessments on the tax bills of all property owners within the boundaries of assessment district that is formed for that purpose.	The annual charge is based on the bond principal and interest due each year and allocated in proportion to the outstanding balance of each of the unpaid parcels within the district.	The amount of the lien on each property is established when the bonds are sold and may not be increased or modified except as may occur due to parcel splits or changes in the debt service schedule.	The charge continues to be levied until the bonds are paid. However, a property owner may prepay their outstanding balance on their property to remove the charge from future tax bills and remove the lien against the property.
Property Assessed Clean Energy (PACE) Special Assessment	Voluntary financing program for energy efficiency upgrades or renewable energy installations, which allows property owners to pay the resulting debt obligation through their property tax bills.	The PACE provider calculates the annual charge based on the outstanding debt balance at an agreed upon interest rate plus any applicable administration fees.	The voluntary assessment is secured by a senior lien on the property that can result in accelerated foreclosure if allowed to become delinquent.	The charge continues to be levied until the bonds are paid. However, a property owner may prepay the outstanding balance of their lien to remove the charge from future tax bills.

**SPECIAL ASSESSMENTS AND DIRECT CHARGES  
2024-2025 FISCAL YEAR**

Questions relating to Special Assessments and Direct Charges should be directed to the contact offices listed below and on the tax bill. There are a number of special assessments and direct charges which are levied on the properties benefited. These charges are assessments levied pursuant to the improvement acts of the State of California, which are liens on a specific parcel of property, i.e. sewer charge or landscape/lighting, or a direct charge levied on specific properties for services performed, i.e. weed abatement or water availability.
