

WEEKLY REPORT OF ENVIRONMENTAL DOCUMENTS AVAILABLE FOR REVIEW (“Courtesy Notice”)

The purpose of the environmental review process is to provide information about the environmental effects of the actions and decisions made by the County, so that these considerations become a part of the decision-making process. The following is a summary of the most recent determinations made by the County’s Environmental Coordinator; these weekly Courtesy Notices can be viewed online at slocounty.ca.gov/CourtesyNotice. The purpose of this listing is to notify the public of pending actions, which may affect the environment of San Luis Obispo County. You are invited to participate in this process by reviewing and providing comments on the recommendations of the Environmental Coordinator. Your comments should be addressed to the Environmental Coordinator (address at end of document). For more information about the environmental review process, please visit: slocounty.ca.gov/EnvironmentalReview

Proposed Negative Declarations

A Negative Declaration is issued for projects that would not result in significant effects on the environment. In many cases, the project applicant has added mitigation measures to the project to reduce environmental impacts in order to qualify for a Negative Declaration. If you disagree with the issuance of a proposed Negative Declaration, you may provide comments or file a Request for Review (appeal) of the Negative Declaration. Requests for Review must be filed within two weeks of the date that the proposed Negative Declaration is posted and must address only environmental issues. There is a fee for the request. If you would like more information about this process, please contact the Environmental Coordinator.

For the period of September 20 – September 2021, 2021

[Rancho De Suenos LLC, Major Grading Pemrit, ED20-135 \(PMTG2020-00044\)](#)

SCH Number: [2021090344](#)

Request by Rancho De Suenos LLC for a Major Grading Permit (PMTG2020-00044) to construct a new, lined 9.57-acre/foot agricultural reservoir to impound water for irrigation to serve an existing vineyard. The reservoir will be approximately 300 feet long by 125 feet wide by 14 feet deep. It will be lined with a textured HDPE geomembrane and have an overflow PVC pipe outlet structure. The reservoir will be supplied with groundwater from an existing well and pump on on the adjacent property to the east of the subject property (APN 027-011-034). This property is under the same ownership as the applicant. The project would result in the disturbance of 1.75 acres of a 310-acre site including 10,274-cubic-yards of cut and 10,220-cubic- yards of fill material. The project is within the Agriculture land use category and is located at 1 Allende Road, approximately 1 mile north west of the community of San Miguel. The site is in the Salinas River Sub Area of the North County Planning Area.

The proposed reservoir will be filled using water from the existing well, and will be emptied of well supplied water from November 1st through March 31st, maintained at full condition for April 1st through May 31st for frost protection, and at a quarter full condition from June 1st through October 31st . The proposed reservoir will be used to permit greater flexibility in the irrigation practices that are associated with the vineyard operation and to provide a water supply in the event that frost protection is needed.
