

Private Stormwater System Plans and Manuals

PLANS AND MANUALS SUBMITTAL REQUIREMENTS:

The applicant must compile and submit **one copy** of pertinent manuals and maintenance requirements for each unique type of Structural Control Measure comprising the system. The manuals and instructions will be retained on file at the Department of Planning & Building, referenced by the assigned Condition Compliance Monitoring (CCM) case. The Plans and Manuals are retained separately from the recorded document to minimize recording costs and to allow the Department to more easily reference or provide copies of the Plans and Manuals to future property owners.

Applicants may use a combination of SWP-1008 forms provided by the Department to document the required information for the submittal. Applicants may submit the Plans and Manuals information in another format, as long as all required information is included.

Per the requirements of Resolution No R3-2013-0032, the Plans and Manuals submittal must include the following items:

- Short-term maintenance requirements;
- Long-term maintenance requirements;
- Recommended frequency of maintenance;
- Estimated cost of maintenance;
- A copy of the Exhibit B Site map;
- Operational procedures (attach copies of vendor manuals/instructions, as applicable); AND
- Contact information for vendors who can provide replacement parts/materials (as applicable).

The Department of Planning & Building strongly recommends that a full copy of the Plans and Manuals submittal be provided to the building owner or operator. The relevant SCM inspection forms and inspection coversheet should be included in the Plans and Manuals provided to the owner/operator.

The Department provides annual inspection report forms for SCMs. The SCM type and appropriate inspection form are detailed below. All inspection forms are available online.

Form Name	Form Number	SCMs included on Form
Detention Feature SCM Inspection Form	SWP-1011	Detention Basin
Vegetated Feature SCM Inspection Form	SWP-1012	Biofiltration, Bioretention, Vegetated Swale, Vegetated Buffer Strip
Pervious Pavement SCM Inspection Form	SWP-1013	Pervious Pavement
Subsurface Treatment Feature SCM Inspection Form	SWP-1014	Media Filter, Treatment Vault, Filtration Device
Infiltration Feature Inspection Form	SWP-1016	Infiltration Feature or Basin
