

Central Coast Blue

— One Community. One Water. One Future —

Central Coast Blue is a regional, indirect potable reuse project that will provide a drought-resistant, sustainable local water supply.

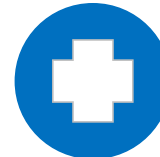

Central Coast Blue

— One Community. One Water. One Future. —

Three Agencies managing water collaboratively and holistically

Improved groundwater quality through injection of water with low TDS and nitrates

Promotes water independence and sustainable drought-resilient water supply

Establishes seawater intrusion barrier that will protect the groundwater basin

Award-winning public engagement and outreach

Project is requesting \$2M for \$54M project
